## OVER **50 YEARS OF EXPERIENCE**

Founded in 1959, Sgariboldi has been manufacturing diet feeders since 1969. In 1987, constantly driven by innovation, it became the first company in Europe to come up with a self-propelled machine that mechanises the entire animal feed mixing and distribution cycle on its own, the Combitre.

Today, Sgariboldi designs and manufactures technologically-advanced diet feeders, which are highly regarded and utilised all around the world.

# 3 Exclusive Mixing Systems

The company's expertise is derived from the experience that it has gained in various work situations, thus allowing it to offer the most effective solutions designed for the farmer's specific needs.

As a workshop specialised in farm machinery repair, Sgariboldi began manufacturing a hay making machine (first patent).

Sgariboldi, at the top of the sector in Europe, introduced Combitre, one of first self-propelled feeder in the world which mechanised the complete zootechnical feeding cycle by itself. Combitre earned a technical innovation award at the Eima exhibition in Bologna.

Sgariboldi multiplied its production potential, and opened a new location in Codogno, with a total area of 15,000 m<sup>2</sup> (161,500 ft<sup>2</sup>).

Sgariboldi launched Intellitechnology, an innovative system that automatically regulates each phase of the mixing cycle.

2016

Pursuing even greater production efficiency objectives, Sgariboldi added a new work area to the existing structures, reaching a total corporate extension of 22,841 m<sup>2</sup> (246,000 ft<sup>2</sup>).

1987 1959 1969

Sgariboldi was one of the first in the world to being manufacturing diet-feeders. There was immediate and unanimous interest in the new feeding technique.

1990

The company came up with the revolutionary concept of the Monofeeder, a patented twin flow mixing system with a single horizontal auger.

2002

2019 2022

2021

The company introduced the 6000 Series, which consists of compact, manageable and high-performance machines of the latest generation.

2017

Sgariboldi introduces TITANIUM SERIES, a revolutionary ultralight self-propelled machine, capable of extraordinary load capacity, thanks to the use of use of special steels, without the added weight and expanse of an extra tandem axles.

# TRAILED AND STATIONARY MIXER FEEDER

# CUSTOM MADE MACHINES MADE UPON REQUEST

We get excited when our customers are satsfied. At Sgariboldi, customer satisfaction has always been a vital goal.

We value quality and the details that make the difference

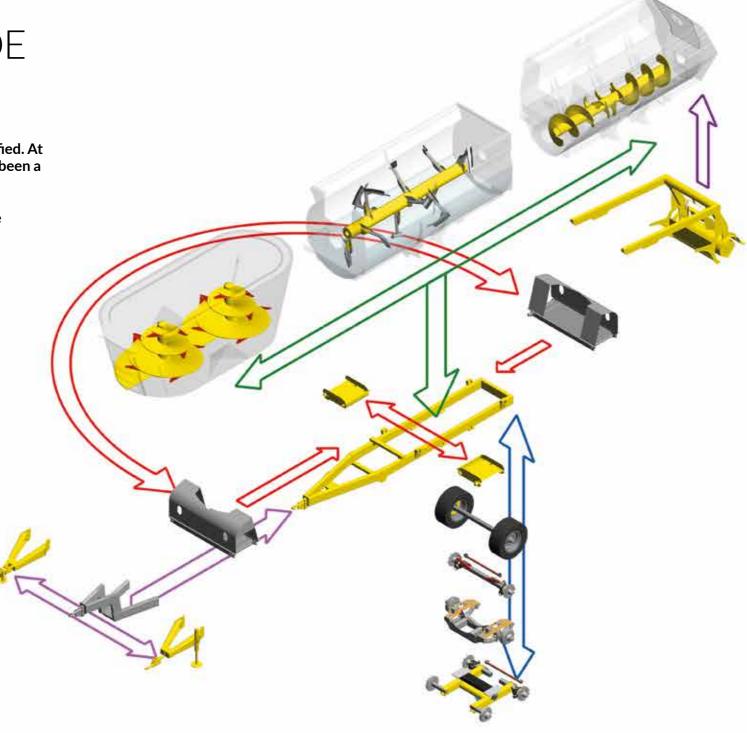

Any specific needs, even the most difficult to achieve, are taken up by our qualified and experienced technical staff, who diligently work to come up with projects that are capable of meeting even the most challenging requirements.

Sgariboldi Special Operation is the highest custom made manufacturing expression that ensures a dedicated design, perfectly in line with the customer desires. The goal is to provide unique, and totally personalised solutions.

# Custom built machines

# What is now proved was once only imagined

(William Blake)

# Sgariboldi **Precision Farming**

- Constant and controlled rations managed at 360°
- Guaranteed animal wellness
- Increase productivity thanks to the management of the rations
- Data accessible at any time and from any type of device: PCs, Smartphones or Tablets
- Possibility of outfitting the machine with sensors of the latest generation in order to monitor the mixture starting with the loading phase (NIR)
- Constant and continuous development of new technologies in collaboration with major research institutes, with the aim of obtaining the ideal mixture based on the operator's specific needs

# MONOFEEDER® HORIZONTAL TECHNOLOGY

Twin Flow: an original patented system

#### A double flow to speed-up work.

The auger, with its counterposed spirals, forces a dynamic twin flow upon the materials, from the front and rear part of the machine towards the centre of the mixing tank.

- The SG version (optional), the best for mixing without cutting, is able to perfectly homogenise the pre-cut products
- The RC version (optional), a patented baling kit, is capable of splitting apart bales of all sizes, diameter and compactness, though still preserving the product's structure

### With loading system

#### Loading drum

The design and the shape of the drum, the position and the layout of the knives, combined with the very high power, make possible a perfect loading of any product. This allow to mantain a smooth and uniform pile face, thus preventing the mouldying as well.

#### **Protection shield**

The rear shield, which makes possible to always keep the auger rotating, is a panel that rises itself with the progressive lifting of the loading arms, thus making impossible any accidental contact with the mixing auger.

## The advantages of the **deflector**

- Reduces mixing time
- Allows effective material flow, called "Twin Flow"

#### **Bolted counter knives**

with an especially designed arrangement according to the various types of ingredients.

Uniform and precise discharging of the ration

#### Rear shield

The duly shaped hydraulic shield makes it possible to collect the products down to the bottom and obtain a perfect cleaning of the ground.

#### **VERSATILE AND EFFICIENT**

- Available from 7 to 22 m³
- Flexible and practical, designed to meet any operating requirements
- Loading drum suitable of loading any type of product
- A single auger with opposing screws and special blades

**Complete absence of friction** during each mixing phase, and **complete** emptying of the mixing tank during the discharge phase

## **PADDLE** MIXING SYSTEM

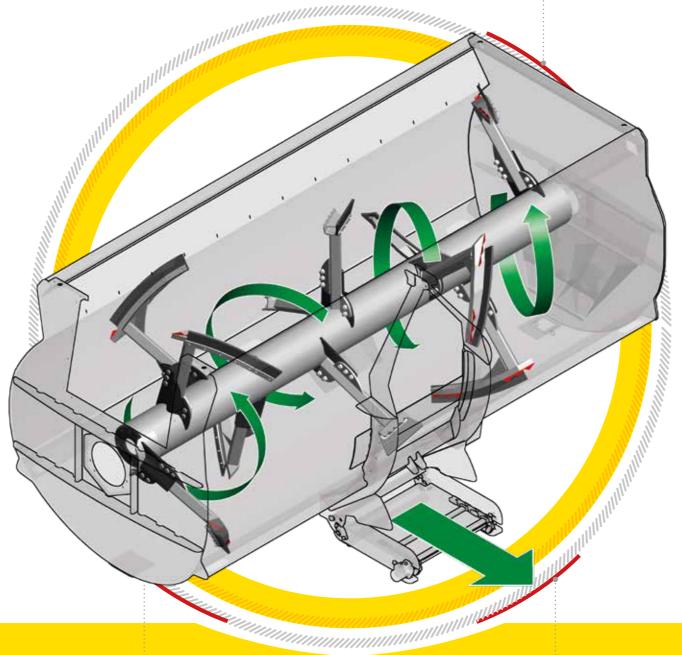

Everything on Gulliver machines is designed to satifly the mixing requirements; all the products are easily and gently processed to preserve their structures.

### Quick and perfectly uniformed mixture

Each ingredient of the meal is processed in such a way that the mixing time is fully optimised.

- Respect of the structure of each ingredient
- Homogeneous, fresh and very soft mix
- Reduced mixing time and low energy consumption

A certified and one-of-a-kind mixture

Thanks to its revolutionary technology, the Gulliver model has been awarded mixture quality certifications by authoritative international institutes.

Perfectly suitable for preparing compound feeds and integrated compounds.

**Optional stainless** steel mixing tank cover

## VS2 VERTICAL TECHNOLOGY

Sgariboldi develops compact vertical diet feeders with exceptional design and maintenance features, which are ideal for breaking down and rapidly cutting bales of fodder of any size, shape, and weight, and are suitable for any work requirements.

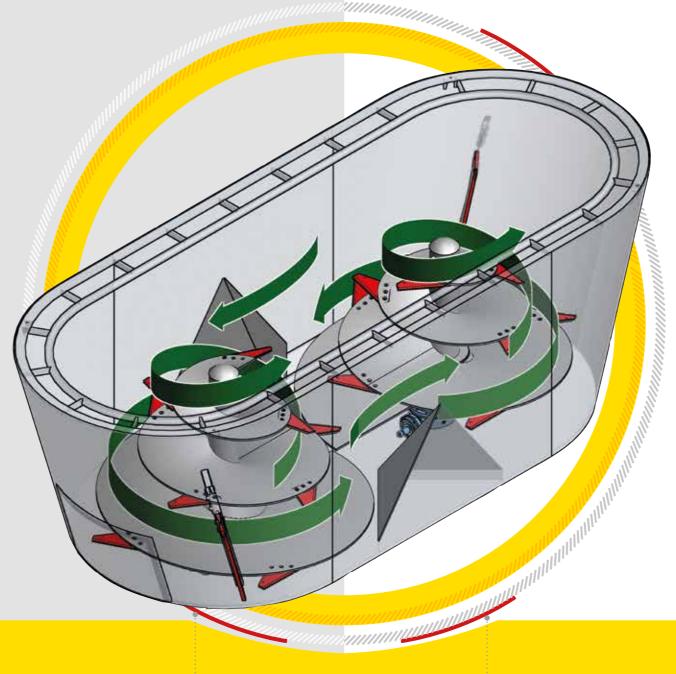

# Mixing tank: strength and functionality

The mixing tank shape, which is extremely strong, conditions the flow of materials in order to quickly obtain the best mix, by also preserving the structure of the loaded ingredients.

## Auger and knives designed for the best chopping action

The conical auger, together with special knives, allows:

- The cut of long fibre products
- The swift flaking off of any bales
- Reduced working times by avoiding overheating in the mix
- The retention of an excellent fodder value and excellent ration softness

# Versatility, **efficiency** and reliability

Careful design and top quality components provide the best performance. Fast working times, reduced power absorption and remarkable energetic savings are featured on one of the most flexible and sought-after machines on the market.

Counter-knives in the mixing tank: they ensure clean cut of fibrous products

# COMPETENCE AT **CUSTOMER**'S SERVICE

A constant commitment to providing reliable machines and high-quality service.

#### TESTING

Each machine is tested flushing the hydraulic system.

#### **SPARE PARTS**

A large warehouse provides original spare parts that meet the highest customers needs.

#### AFTER SALE SUPPORT

Sgariboldi guarantees after-sale support with its qualified and multi-language staff.

#### TRAINED TECHNICAL PERSONNEL

Internal and external technical staff is constantly trained by the headquarter, in order to guarantee prompt and effective technical support service.

**□** 34

# **WORLDWIDE** PRESENCE

**Sgariboldi's solutions** can be found in every country worldwide, where the farmers' needs and the quality of the products are often different, or even unique. The experience and specific skills that Sgariboldi has gained over the years have led it to invest more heavily in the global market. While our work constantly leads us into new areas, the company's values, which are rooted in the continuous pursuit of excellence, have always remained the same.
